

Omkar Deepak Shinde

CSE Undergrad Student

Aspiring **AI student** passionate about **Web development**, proficient in open-source technologies, with strong problem- solving skills and the ability to excel under pressure.

Academic Details

B. Tech in Computer Engineering
(AI specialization)
**Manipal Institute of Technology,
Bangalore;**
CGPA: **8.0** (2021 - 2025)

10th CBSE -> **92%**
12th CBSE -> **85%**

Soft Skills

- Analytical
- Problem Solver
- Leader
- Adaptive
- Collaborative

Technical Skills

- HTML, CSS, Javascript
- Python Libraries
- MERN Stack
- C++
- Java
- C Language
- ML & DL
- MySQL
- OpenCV

Personal Details

Date of Birth: 17th November 2003
Languages Known: English, Hindi and Marathi

Profile Summary

- A detail-oriented person with **Full Stack** projects and experience of 3 months working in python libraries like **pytesseract** and **regular expressions**.
- Experienced as an **AI intern at ELIXIR.AI** and **Web Development intern at Codsoft** showcasing different projects involving machine learning and NLP technologies and key Web Development tools.
- Created an **e-commerce website** whereas resolving challenges and gaining knowledge about MERN Stack.
- Developed a software to **extract key value pairs** from documents using python libraries such as **OpenCV** and **Pytesseract** along with NLP expressions.
- Identified the bottlenecks in line by execution of pytesseract** and worked around a solution for that using section-wise extraction.
- Also **developed a ML model** for detection of bottles kept in fridges in retail shops while also **computing their compliance score**.

Work Experience

AI Intern
ELIXIR.AI , PUNE

March 2024 – July 2024

- Project - 1: Key – Value Pair Extractor**
- Led a client project** to develop key-value pair extraction software for **medical documents** using Python, achieving accurate text extraction with **PyTesseract, OpenCV, and regular expressions**.
 - Addressed PyTesseract's line-by-line extraction limitation** by implementing **section-wise extraction techniques**, significantly improving data accuracy and processing efficiency.
 - Delivered **streamlined text processing workflows**, enhancing the reliability and performance of the extraction process.
 - Tools used:** Python, PyTesseract, OpenCV, Pandas, PDF2Image, Pillow, regular expressions.

- Project - 2: Bottles Compliance Score Generator**
- Led a client project** to develop a model from scratch for **detecting bottles in a cooler** using over **4000 images**, returning a compliance score based on bottle positions.
 - Trained the model** to accurately identify bottle placements and calculate compliance scores, ensuring high precision and efficiency.
 - Delivered a robust and reliable system** for monitoring fridge contents, enhancing operational compliance and efficiency.
 - Tools used:** Roboflow, NumPy, Pandas, TensorFlow, Keras, OpenCV.

Web Developer Intern
CodSoft , Bangalore

February 2024 – March 2024

- Project - 1: Flight Booking Website**
- Developed a fully functional flight booking website, ensuring seamless user experience and robust performance.
 - Implemented key features such as flight search, booking management, and secure payment integration, significantly enhancing user engagement and transaction efficiency.
 - Optimized the website for scalability and speed, resulting in improved load times and customer satisfaction.
 - Tools used: HTML, CSS, JavaScript, Node.js, MongoDB.

Academic Projects

PROJECTNAME: Video Recommendation System **TOOLS:** Python, Numpy, Pandas, Scikit learn, FastAPI, Postman, SQLite **PROJECT DESCRIPTION:**
Gives Video Recommendation based on top watched category and user ratings and likes.

PROJECTNAME: Cruxi Chatbot **TOOLS:** Python, Flask, NLP, OpenAI API **PROJECT DESCRIPTION:**
Local chatbot using OpenAI model gpt-3.5 turbo API.
