Education

Manipal Institute of Technology - CGPA: 7.83

Aug. 2021 – July 2025

Bachelor of Technology in Computer Science

Bangalore, Karnataka

Relevant Coursework

- Front-end Development
- Programming with JavaScript
- Reinforcement Learning
- Introduction to Big Data
- AI for Everyone
- UI/UX Design

Experience

ELIXIR.AI

March 2024 – July 2024

Data Science Intern

Pune, Maharashtra

- Built an OCR-based Python tool for extracting key-value pairs from medical documents, achieving a 20% improvement in text recognition accuracy using PyTesseract and OpenCV.
- Implemented advanced section-wise text extraction, enhancing data precision and processing efficiency.
- Designed and trained a custom AI model for cooler compliance monitoring with 95% accuracy, using TensorFlow, OpenCV, and a dataset of over 4,000 images.
- Delivered a real-time cooler content monitoring solution integrated with TensorFlow and Roboflow, improving operational compliance and efficiency.

CodSoft

February 2024 – March 2024

Front-End Developer Intern

Bangalore, Karnataka

- Created a flight booking website with features like flight search, booking management, and secure payment processing using Node.js and MongoDB.
- Enhanced user experience through responsive design, reducing page load times by 30% and increasing customer satisfaction.
- Conducted API integrations for real-time flight data, handling over 500 transactions per day, and established data validation pipelines, improving transaction security by 30%.
- Utilized tools and technologies such as HTML, CSS, JavaScript, Node.js, and MongoDB to build and manage the platform effectively.

Projects

Video Recommendation System | *Python, FastAPI, Pandas, Numpy, Scikit-learn, SQLite*

April 2024

- Built a video recommendation system with Python, FastAPI, and SQLite, handling 5,000+ videos and 1,000+ user interactions.
- Used deep learning and Scikit-Learn preprocessing on 10,000+ data points.
- Optimized response time to <500ms, boosting engagement by 20%.

AI Chatbot | *Python, NLP, Regex, API, Flask*

July 2023

- Developed an AI chatbot using FastAPI and GPT-3.5 Turbo for seamless interactions.
- Integrated context handling to improve response relevance.
- Optimized processing, reducing average response time by 30%.

iNotes | *HTML, CSS, JavaScript, MERN stack, Bootstrap, Bcrypt.js*

April 2024

- Engineered a secure web application using the MERN stack for encrypted note storage, ensuring 100% compliance with data privacy regulations and protecting over 1,000 user notes.
- Designed a multi-level authentication mechanism to fortify user authorization and enhance overall system security.
- Applied efficient backend processes to reduce server response times, achieving a 25% performance boost.

Technical Skills

Languages: Python, Java, C++, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, API Development, Cloud Platforms, GitHub

Technologies/Frameworks/Libraries: React.js, Pytesseract, Tensorflow, Keras, Numpy, Pandas, PDF2Image, MySQL, MongoDB

Extracurricular

Manipal Open Source Community (MBOSC)

April 2023 – April 2024

Treasurer

Manipal Institute of Technology

- Managed the community's budget, handling all financial aspects and ensuring successful execution of multiple events.
- Coordinated with the executive board to execute key initiatives, improving community operations by 20%.
- Drove chapter service and unity-focused programs, enhancing community engagement and overall member experience.
