EXPERIENCE

June-Aug 2024 **TECHNO TRENCH:**

Pune, Maharashtra

WEB DEVELOPER INTERN

- Built a Next-Js-based internship portal in 2024, providing internship opportunities for over 500 interns. Led the project from concept to deployment, ensuring a robust solution.
- Utilized React and JavaScript to create an interactive, user-friendly platform and responsive features. This significantly enhanced user engagement by 50%, making it easier for interns to apply for opportunities.

Jan-feb 2024 **RABLO:**

Bengaluru, Karnataka

FRONTEND DEVELOPER INTERN

- Worked as a Frontend Developer intern at Rablo, collaborating with a team of 5 developers, UI/UX designers, and backend engineers to build user-friendly and responsive web applications.
- Developed and optimized the front-end interface using React.js, HTML, and CSS, ensuring seamless integration with backend services and enhancing user experience across multiple devices.

Feb 2024

MALWARE DETECTION GUI APP:

Bengaluru, Karnataka

CYBER SECURITY PROJECT (TESTING)

- Developed a Python application leveraging the dpkg GUI library for signature-based malware detection, significantly enhancing security measures and improving threat identification for the organization.
- Cross-referenced file hashes with an extensive repository of over 10,000 known malware signatures, ensuring comprehensive threat coverage and reducing false positives by 20%.
- Achieved malware detection in less than 2 seconds, significantly improving response time and enabling faster mitigation of potential threats, resulting in a 30% decrease in system vulnerability.
- Designed a user-friendly malware management interface that streamlined detection processes, making threat identification faster and improving overall incident response efficiency by 25%.

April 2024

STOCK MARKET ANALYSIS:

DATA ANALYTICS PROJECT

- Developed a stock market analysis tool using Python and LSTM-based Recurrent Neural Networks to predict future stock prices for companies like Google, Amazon, Microsoft, Apple, and Tesla.
- Analyzed the impact of training epochs on prediction accuracy, achieving improved forecasting precision and highlighting the effectiveness of machine learning in financial market predictions.

EDUCATION

2021-2025

MANIPAL INSTITUTE OF TECHNOLOGY

Bachelor of technology:Computer Science with Cyber Security specialization

Bengaluru,Karnataka

CGPA 7.3

2019-2021

KENDRIYA VIDYALAYA ARMY AREA

12th Board

Pune,Maharashtra

Percentage 90.8%

2019

JAYAWANT PUBLIC SCHOOL

10th Board

Pune,Maharashtra

Percentage 91%

OTHER

- Languages: English (Fluent),Hindi (Fluent), Marathi (Fluent), Japanese (Basic)
- Technical Skills: Java, Python, Html, CSS, javascript, React, NextJs, Github
- Certifications: Analyze Network Traffic with TCPDump(Coursera), Introduction to Information Technology and AWS Cloud
